Packing & the Friendly Skies

Why Transporting Firearms May Be The Best Way To Safeguard Your Tech When You Fly
you may have seen me before...
i speak at lots of cons...
many of which i can’t drive to...

Washington, D.C.  Oslo, Norway  Chapel Hill, North Carolina  Vancouver, Canada  Amsterdam, Netherlands  Cleveland, Ohio  Austin, Texas

Seattle, Washington  Pasadena, California  Sardinia, Italy  Honolulu, Hawaii  Las Vegas, Nevada  Las Vegas, Nevada  Bergen, Norway

San Diego, California  Toronto, Canada  Kuala Lumpur, Malaysia  Vienna, Austria
my bags used to get opened a lot
... and not always by the TSA
nowadays i lock all my gear
notice... these are not TSA locks
but proper heavy-duty padlocks
how is this allowed?
simple, really...
now, i fly with firearms all the time
flying with firearms...

- it’s easier than you think
- it’s relatively hassle-free
- it results in *major* security
facts and the law...

• federal standards
  (mostly uniform, specifics can vary by airline... but no one can abridge your rights)

• checked bag only, unloaded
  (do I really have to tell you that?)

• non-TSA lock
  (no one else gets the key or combo)

• declared upon check-in
specifics about packing...

• **hard case, size can vary**
  (I’ll assume you’ll use larger luggage to leverage the law to your advantage)

• **ammo policies can vary a lot by airline**
  (how it’s packed, how much you can carry, same luggage or separately)

• **bags may not be opened once secured**
  (unless you are present)

• **no outside indicator labels of any kind**
  (27 CFR 478.31 - Delivery by Common or Contract Carrier, 18 USC Section 922e)
how the procedure works
and what to expect...
Packing & the Friendly Skies
Deviant Ollam
some extra pointers that can make the whole process easier, better, faster, stronger...
extra pointers...

- don’t be a dumbass when you declare
- name tags on everything, inside and out
- keep cases locked as much as possible
  (better to be asked five times to open them than to send them away unsecured)
- getting to secondary screening area
- no outside indicator labels of any kind
  (that’s US federal law, other nations have own standards)

Federal law states: “No common or contract carrier shall require or cause any label, tag, or other written notice to be placed on the outside of any package, luggage, or other container that such package, luggage, or other container contains a firearm.” 18 USC Section 922(e)

my advice . . .
if there’s a problem...

- know the rules, show the rules

(legal citation sheet on deviating.net)
if there’s a problem...

• know the rules, show the rules
  (legal citation sheet on deviating.net)

• stay polite, stand your ground

• be direct, you are doing nothing wrong

• peace of mind over lost luggage

still, nothing as satisfying as...
more tips...

- insurance coverage can vary
- possible to play with weight a bit
- inside other luggage? sure, but why?
- not just “functional” firearms...
what counts as a firearm?

• proper guns
• flare guns
• starter / blank pistols
• airsoft pieces
• replica weapons
• gun parts & hardware?

the law specifies “firearms” which, by definition, expel a projectile by means of a combustible propellant... but essentially, they want to avoid screeners or automated x-ray equipment seeing anything that looks like a firearm when they weren’t expecting to encounter it.

Packing & the Friendly Skies
Deviant Ollam
how do the various carriers rate?

A
U.S. Airways
Continental
Southwest Airlines
Midwest Airlines
(maybe)

B
United
Alaska Airlines
Horizon Air
Frontier Airlines

C
Hawaiian Airlines
American Airlines
Continental
AirTran

D
jetBlue Airways
NWA
Northwest Airlines
Grade: B-
While Delta is not openly hostile to gun owners, some of their policies are clearly designed simply to generate revenue. While they explicitly state that a case may contain a total of four long guns, in subsequent sentences they specify that anything more than two rifles or two shotguns will result in an extra baggage fee. While Delta does not mandate "original manufacturer packaging" for ammo like some airlines, their policies are still restrictive enough that a holstered magazine is not allowed.

United Airlines
as specified on their web site...

Firearms in checked baggage must be packed in a locked hard-sided bag or gun case.

Ammunition is allowed in checked luggage in the original manufacturer's box or securely packed in a fiber, wood, or metal box to prevent movement of cartridges.

There are a handful of stories concerning problems with United (sometimes losing firearms, sometimes printing a row of "F" characters on luggage tags) but these accounts are conflicting and all unsubstantiated. One that is for certain, however, is that the company speaks out publicly against the arming of airline pilots.

Grade: B or B+
United is flexible about how guns and ammo can be packed, as long as it's secure. They appear to even be accepting of the use of loaded clips to secure ammo... since they specify "no movement" of cartridges as opposed to "separation" of the rounds. Pending confirmation that the row of "F" characters is a rumor (I personally have never seen this) I'd rate them in B range. If the story of that outside marking is true, even in some instances, then I'd switch United to a B- or C+ even.

US Airways
as specified on their web site...

US Airways will allow passengers to transport firearms in accordance with Federal Law.

Grade: A+
Firearms must be packed in a manufacturer's hard-sided container specifically designed for the firearm, a locked hard-sided gun case, or a locked hard-sided piece of luggage.
# Air Travel Accounts

The following overviews give you a basic rundown of people's experience flying with firearms on different carriers via different airports. Air carriers, in my opinion, take responsibility for errors that their employees make and that the TSA should work harder to standardize airport operations and train their staff in the proper handling of firearm policies and procedures. Click any of the passenger names below to read their full story...

Luggage & Gear

As always, I was traveling with three of the army surplus steel mortar cases that are my customary luggage. After major error by the TSA in Newark when I was making some overseas travel (they cut locks of some of my luggage) I made the switch to Aloy Protec Fack Padlocks which are uncuttable as well as wholly un-pickable. On this trip to meet with TOOOL associates in Iowa I had one Beretta Model 92 pistol.

Outbound Travel ★★★★★

I arrived particularly early for my morning flight out of PHL. Even at 06:30, the airport was bustling and staff were present everywhere to handle check-ins. Niru and Kyrah (in many instances, I do my best phonetic spelling of names told to me verbally... this is such an instance) checked me in. I was not asked to open and show the unloaded status of my pistol. Kyrah insisted that there is no special entry in the USAir baggage tracking system for firearm-bearing luggage. As usual, after the basic check-in we proceeded down to counter number 19 where the oversize baggage belt is located. My hard case was sent (locked) back to the TSA while Niru waited with me. I heard the word "firearm" called out in some discussions as they found a screener to perform an immediate x-ray run. All things were clear. I have never had an issue checking in at this airport with this carrier, but one is given to wonder what policy they have in place if a firearm bag alerts in some way... where does secondary screening take place?

Homebound Travel ★★★★

When checking-in for my United Airlines journey back to Philadelphia I was helped first by Crystal and then by Kevin, the former seeming a bit unfamiliar (though by no means difficult) with matters of firearms. In response to an inquiry of "which of [my] bags contain firearms" (I was coming home with lockpicking equipment from Iowa, inside an additional piece of luggage that I didn't have with me before) I asked...
Firearm Air Travel Questionnaire

Have you traveled by air with firearms? We would love to hear, in detail, how it went for you. If you'd like to tell us about it, please just send an email to deviant@deviant[dbl]net* and we're more than happy to publish your account here. All we ask is that you follow the format of this questionnaire when summarizing the details for us.

* address obfuscated to prevent spam. PGP key on major keyservers if you wish to secure your traffic.

Background Details

1. Your Name - We can accept nicknames, initials, or just your first name if you'd like to remain a bit private.

2. Your Itinerary - This is your booked route and planned travel dates, whether a simple round-trip or some other combination of stops. Mention of delays or re-routings can be done later when discussing specific legs of your journey. Airport codes are more helpful than city names (and are more respectful of your privacy... we only care about air travel, not where you spent the 4th of July or which family you visited for Thanksgiving.) Please feel free to specify any scheduled layovers, despite the fact that these typically do not affect firearm-related travel.

3. Your Airline(s) - On which carrier(s) was your flight booked? Please feel free to mention any reasons why you chose these airlines, as well as any partnering or "dual-carrier" flights that happened (that is so common these days, we understand it's difficult to keep track)

4. Luggage and Locks - What brand (or what style) of luggage did you use when flying with firearms? How were they packed? In what manner were they secured? (We are especially interested in what brand or style of locks you used.)

Outbound Departure Experience

5. Airline Check-In Staff - From the time you stepped from your airport transportation (car, cab, shuttle, train, etc) to the moment you received your boarding pass, how were you treated? How did the airline staff (both ticketing agents as well as any additional people like baggage staffers) react when you declared your firearms? Did they seem accustomed to this? Did they follow all the rules? Of particular interest to us...

   i. Locked Bags - Did the check-in staff make any criticisms of your desire to lock your checked bag(s)? Did they inform you that you had done anything incorrectly? Did you have to escalate the matter to a supervisor, etc?
please... tell me how it goes for you!
